

R7 historical syllabus fixture. Course 6.033, Computer System Engineering, was taught in Spring 2018. It belongs to Electrical Engineering and Computer Science and is undergraduate level. The instructor was Katrina LaCurts. Each week had two one-hour lectures, two one-hour recitations, and one one-hour tutorial. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Prerequisite facts. Course 6.033 required 6.004, Computation Structures. It also required either 6.005, Software Construction, or 6.009, Fundamentals of Programming. The alternative is an any-of requirement and must not be flattened into a claim that both 6.005 and 6.009 were mandatory. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
