

R7 historical syllabus fixture. Course 6.042J, Mathematics for Computer Science, was taught in Fall 2010. It belongs to Electrical Engineering and Computer Science and Mathematics and is undergraduate level. The instructors were Tom Leighton and Marten van Dijk. The meeting pattern was two ninety-minute lectures and two one-hour recitations each week. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Requirement facts. The only listed prerequisite for course 6.042J was 18.01. The historical syllabus listed twelve problem sets, a two-hour evening midterm, and a three-hour final. The course covered discrete mathematics for computer science, including proofs, sets, graph theory, counting, and probability. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
