

R7 historical syllabus fixture. Course 6.046J, Introduction to Algorithms (SMA 5503), was taught in Fall 2005. It belongs to Electrical Engineering and Computer Science and Mathematics and is undergraduate level. The instructors were Charles Leiserson and Erik Demaine. The meeting pattern was two ninety-minute lectures and one one-hour recitation each week. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Prerequisite facts. Course 6.046J expected prior completion of 6.001, Structure and Interpretation of Computer Programs. Course 6.046J also expected prior completion of 6.042J, Mathematics for Computer Science. The historical page expected a grade of C or higher in both courses. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
