

R7 historical syllabus fixture. Course 6.828, Operating System Engineering, was taught in Fall 2012. It belongs to Electrical Engineering and Computer Science and is graduate level. The instructor was Frans Kaashoek. The course met for two ninety-minute lectures each week. It studied operating-system design through UNIX, research papers, and implementation labs. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Prerequisite facts. Course 6.828 listed 6.033, Computer System Engineering, as a prerequisite. It also listed 6.170, Software Studio, and 6.004, Computation Structures, as prerequisites. All three course references appeared in the historical prerequisite section. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
