

R7 historical syllabus fixture. Course 6.830, Database Systems, was taught in Fall 2010. It belongs to Electrical Engineering and Computer Science and was listed at graduate and undergraduate levels. The instructors were Samuel Madden, Robert Morris, Michael Stonebraker, and Carlo Curino. The course met for two ninety-minute lectures each week and carried 3-0-9 units. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Prerequisite facts. Course 6.830 expected prior study of 6.033, Computer System Engineering, or equivalent. It also expected prior study of 6.006, Introduction to Algorithms, or equivalent. Prior database experience was not required. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
