

R7 historical syllabus fixture. Course 6.851, Advanced Data Structures, was taught in Spring 2012. It belongs to Electrical Engineering and Computer Science and is graduate level. The instructor was Erik Demaine. The meeting pattern was two ninety-minute lectures each week plus one optional two-hour open-problem session. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Preparation facts. Course 6.851 required 6.046, Design and Analysis of Algorithms, or an equivalently thorough undergraduate algorithms course. The page recommended taking 6.854, Advanced Algorithms, before this deeper graduate course. In this fixture, 6.046 and 6.854 are normalized to graph entities 6.046J and 6.854J while preserving the source wording. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
