

R7 historical syllabus fixture. Course 6.857, Network and Computer Security, was taught in Spring 2014. It belongs to Electrical Engineering and Computer Science and is graduate level. The instructor was Ronald Rivest. The course met for two ninety-minute lectures and one ninety-minute recitation each week. It was a 12-unit, 3-0-9 course. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Preparation facts. Course 6.857 required 6.033, Computer System Engineering, and 6.042J, Mathematics for Computer Science. The page recommended prior study of either 6.006, Introduction to Algorithms, or 6.046J, Design and Analysis of Algorithms, plus experience with modular arithmetic. The two algorithms courses were recommendations, not mandatory prerequisites. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
