

R7 historical syllabus fixture. Course 6.895, Theory of Parallel Systems (SMA 5509), was taught in Fall 2003. It belongs to Electrical Engineering and Computer Science and is graduate level. The instructors were Bradley Kuszmaul, Charles Leiserson, Hsu Wen Jing, and Michael Bender. It had two weekly lectures: one two-hour session and one ninety-minute session. This concise evaluation adaptation was checked against the cited MIT OpenCourseWare syllabus on 2026-09-08 and is not a current MIT catalog statement.

Prerequisite facts. The official prerequisites for course 6.895 were 6.046J, Introduction to Algorithms, and 6.170, Laboratory in Software Engineering, or equivalent material. The course focused on theoretical foundations and algorithmic underpinnings of parallel systems. Adapted from MIT OpenCourseWare under CC BY-NC-SA 4.0; changes were made for a noncommercial retrieval fixture, and no MIT endorsement is implied.
